

Dr. Peterson

Defense Security System Vulnerability Assessments Outbrief

2 p.m. Friday, Jan. 30, 2015, GTRI Boardroom, 5th floor

- Welcome to Georgia Tech. Georgia Tech and DSS have enjoyed a very strong partnership for more than 20 years. We value that partnership and are committed to doing everything necessary to keep that trust.
- We take our commitment to protecting classified and sensitive information very seriously.
- Our commitment is reflected by more than just words; It is reflected through increased staffing, increased security budget, and an increase in training and awareness for all employees.
- It is also reflected in reporting relationships. AI Concord's Research Security operation now reports to Dr. Steve Cross. AI also has a reporting line to me. We are honored that Georgia Tech was selected for the 2014 DSS Award for Excellence in Counterintelligence.

We are committed to continued excellence in the protecting classified and sensitive information for which we have been entrusted.
